

## Professional Portfolio Management – Simplified

Introducing The Alpha Sheet

The Alpha Sheet advanced, high-performance investment management models both simplify and improve advisory services. Dual Defense™ refers to employing two independent methods for determining when to be in defensive funds versus equities. It is published by AlphaDroid, a service of SumGrowth Strategies, every Sunday and on monthly and special rebalance events.

## Overview

Introducing StormGuard

StormGuard incorporates three primary views of the market: Market Trend, Institutional Momentum and Value Sentiment. Twelve separate measures of these three views are logically combined to produce the StormGuard-Armor composite value. Four additional measures of volatility and oversold conditions help hasten exits for Black Swan market crash events and help hasten re-entry following strong rebound events.

[Deeper Dive Info.](#)

StormGuard considers numerous indicators.

**Automated Narrative:** " StormGuard indicates market safety is marginal and declining. NOTE: StormGuard-Armor, like a smoke alarm, is not perfectly clairvoyant but helps improve your long-term batting average."

See Legal-Disclaimer page for technical terms, historical data, and service limits information. Performance updated daily.

## Methodology

Tactical Momentum Strategies. Each of the four underlying strategies uses a rules-based tactical momentum algorithm to evaluate a set of candidate ETFs at each month-end, wherein the trend leader of each is selected to be a member of the model's Portfolio for the subsequent month. Candidate ETFs are defensive ETFs vs equity ETFs.

## Portfolio Construction

[More Charts](#)

Selections are made from a universe of over 48 ETFs that include a wide range of bond and Treasury categories, gold, and the S&P 500 index. The Strategy includes an integrated Bear Market Strategy, which limits the selection to a less aggressive fund universe.

Investor Risk Profile	Rebalance Activity		Dual Defense Strategy	About Momentum Trading Expectations
	Scheduled	Unscheduled		
Fixed Income	Month-End	Exit market quickly for a for Black Swan event. Get back in early for a particularly sharp market rebound.	StormGuard reviews 16 market health measures to determine Bull/Bear. Ultra short-term bonds act as a momentum backstop.	Economic, bureaucratic, and social responses to inflation, politics, and pandemics can disrupt momentum in otherwise orderly markets that is required for profitable trading.

## Methodology

Tactical Momentum Strategies. Each of the four underlying strategies uses a rules-based tactical momentum algorithm to evaluate a set of candidate ETFs at each month-end, wherein the trend leader of each is selected to be a member of the model's Portfolio for the subsequent month. In Bear markets candidates are defensive ETFs vs equity ETFs.

## Portfolio Construction

[More Charts](#)

The Innovation ETF selections are made from a field of 33 ARK, internet, robotics, AI, and bio-genome ETFs. The underlying strategies employ a momentum backstop having defensive funds that compete for momentum leadership with the 33 green ETFs. The Strategy includes a defensive integrated Bear Market Strategy, triggered by StormGuard.

Investor Risk Profile	Rebalance Activity		Dual Defense Strategy	About Momentum Trading Expectations
	Scheduled	Unscheduled		
Growth	Month-End	Exit market quickly for a for Black Swan event. Get back into equities early for a particularly sharp market rebound.	StormGuard reviews 16 market health measures to determine Bull/Bear. A momentum backstop is also directly employed.	Economic, bureaucratic, and social responses to inflation, politics, and pandemics can disrupt momentum in otherwise orderly markets that is required for profitable trading.

Benchmark	10.7%	9.3%	3.6%	6.5%	7.4%	6.9%

## Methodology

Tactical Momentum Strategies. Each of the 12 underlying strategies uses a rules-based tactical momentum algorithm to evaluate a set of candidate ETFs at each month-end, wherein the trend leader of each is selected to be a member of the model's Portfolio for the subsequent month. In Bear markets candidates are defensive ETFs vs equity ETFs.

## Portfolio Construction

[More Charts](#)

The 60:40 Sectors Portfolio is a blended combination of other portfolios including: 32% Alpha Bonds, 20% Alpha Risk Mitigation, and 48% Alpha Sectors. The Portfolio will never allocate more than 60% of its assets to equities. However, both Dual Defense components employ bonds and commodities that at times reduces equities well under 60%.

Investor Risk Profile	Rebalance Activity		Dual Defense Strategy	About Momentum Trading Expectations
	Scheduled	Unscheduled		
Moderate	Month-End	Exit market quickly for a for Black Swan event. Get back into equities early for a particularly sharp market rebound.	StormGuard reviews 16 market health measures to determine Bull/Bear. A momentum backstop is also directly employed.	Economic, bureaucratic, and social responses to inflation, politics, and pandemics can disrupt momentum in otherwise orderly markets that is required for profitable trading.

See Legal-Disclaimer page for technical terms, historical data, and service limits information. Performance updated daily.

## Disclosures & Disclaimers

**The Company:** SumGrowth Strategies, LLC of Seattle, Washington (the Company) is not a registered investment advisor, does not provide professional financial investment advice specific to anyone's life situation, makes no custom strategies or portfolios for anyone, and has no fiduciary relationship with its portfolio model subscribers. The Company develops and markets high-performance investment tools and models.

**Our Models:** The Alpha Sheet Model Portfolios employ the methods and algorithms described in the above Essential Videos, Deeper Dives, and the specific Methodology and Portfolio Construction information associated with each Model. The company publishes these Models online daily at <https://TheAlphaSheet.com> for use by its subscribing financial advisor clients. Trading performance displayed is hypothetical, employs forward-walk testing, represents only historical conditions of the market, and does not include the costs of trading fees, portfolio management fees, account management fees, or other fees. There is no guarantee that such performance will be achieved in the future and there is no representation being made that any account will or is likely to achieve profits or losses similar to those shown. Investing in securities involves risk of loss that clients should be prepared to bear. An investment's objective, risks, charges, and expenses must be carefully considered before investing.

**The Data:** Market data occasionally contains errors or inaccuracies and may also be changed or updated without notice. The Alpha Sheet Model Portfolios are provided "as is" without warranty of any kind. SumGrowth Strategies, LLC, its affiliates and employees make no representation or warranty, expressed or implied as to the suitability, effectiveness, accuracy, availability or completeness of its investment models, and specifically disclaim all other warranties, expressed or implied, including but not limited to implied warranties or fitness for any particular purpose. Neither SumGrowth Strategies, LLC, nor any of its affiliates or employees shall be liable for any direct, indirect, incidental, special, punitive, or consequential damages that result in any way from use, non-use, reliance upon the information, or that may result from mistakes, omissions, interruptions, deletions of files, defects in market data, operational delays, transmission delays, failure of equipment, or failure of performance. The sole and exclusive remedy for dissatisfaction with any information or service provided by the Company is to discontinue using said information or service.
